ACCESSIBLE PLACE HOME EVALUATION CHECKLIST

Client Name: ____________________________
Address: ________________________________
Phone: ________________________________
Date: ________________________________

Exterior

☐ Low-maintenance exterior (vinyl, brick)
☐ Low-maintenance shrubs and plants
☐ Deck, patio, or balcony surfaces are no more than ½ inch below interior floor level if made of wood

NOTES:________________________________________________________________________

Overall Floor Plan

☐ Main living on a single story, including full bath
☐ No steps between rooms/areas on the same level
☐ 5-foot by 5-foot clear/turn space in living area, kitchen, a bedroom, and a bathroom

NOTES:________________________________________________________________________

Hallways

☐ Minimum of 36 inches wide, wider preferred
☐ Well lit

NOTES:________________________________________________________________________
Entry

- Accessible path of travel to the home
- At least one no-step entry with a cover
- Sensor light at exterior no-step entry focusing on the front-door lock
- There needs to be 32 inches of clear width, which requires a 36-inch door
- Non-slip flooring in foyer
- Entry door sidelight or high/low peep hole viewer; sidelight should provide both privacy and safety
- Doorbell in accessible location
- Surface to place packages on when opening door

NOTES:__________________________________________________________

Thresholds

- Flush preferable
- Exterior maximum of ½ inch beveled
- Interior maximum of ¼ inch

NOTES:__________________________________________________________

Interior Doors

- There needs to be 32 inches of clear width, which requires a 36-inch door
- Levered door hardware

NOTES:__________________________________________________________

Windows

- Plenty of windows for natural light
- Lowered windows or taller windows with lower sill height
- Low maintenance exterior and interior finishes
- Easy to operate hardware

NOTES:__________________________________________________________

Garage or Carport

- Covered carports and boarding spaces
- Wider than average carports to accommodate lifts on vans

NOTES:__________________________________________________________
Door heights may need to be nine feet to accommodate some raised roof vans
Five-foot minimum access aisle between accessible van and car in garage
If code requires floor to be several inches below entrance to house for fume protection, can slope entire floor from front to back to eliminate need for ramp or step
Ramp to doorway if needed
Handrail if steps

NOTES:__________________________________________________________________________

Faucets

Lever handles or pedal-controlled
Thermostatic or anti-scald controls
Pressure balanced faucets

NOTES:__________________________________________________________________________

Kitchen and Laundry

Counters

Wall support and provision for adjustable and/or varied height counters and removable base cabinets
Upper wall cabinetry three inches lower than conventional height
Accented stripes on edge of countertops to provide visual orientation to the workspace
Counter space for dish landing adjacent to or opposite all appliances
Base cabinet with roll out trays and lazy susans
Pull-down shelving
Glass-front cabinet doors
Open shelving for easy access to frequently used items

NOTES:__________________________________________________________________________

Appliances

Easy to read controls
Washing machine and dryer raised 12 to 15 inches above floor
Front loading laundry machines
Microwave oven at counter height or in wall
Side-by-side refrigerator/freezer
Side-swing or wall oven
Raised dishwasher with pushbutton controls
Electric cook top with level burners for safety in transferring between the burners, front controls and downdraft feature to pull heat away from user; light to indicate when surface is hot
NOTES:__________________________________________________________________________

Miscellaneous

☐ 30-inch by 48-inch clear space at appliances or 60-inch diameter clear space for turns
☐ Multi-level work areas to accommodate cooks of different heights
☐ Open under-counter seated work areas
☐ Placement of task lighting in appropriate work areas
☐ Loop handles for easy grip and pull
☐ Pull-out spray faucet; levered handles
☐ In multi-story homes, laundry chute or laundry facilities in master bedroom

NOTES:__________________________________________________________________________

Bathroom

☐ Wall support and provision for adjustable and/or varied height counters and removable base cabinets
☐ Contrasting color edge border at countertops
☐ At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space
☐ Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250 - 300 pounds
☐ If stand-up shower is used in main bath, it is curbless and minimum of 36 inches wide
☐ Bathtub - lower for easier access
☐ Fold down seat in the shower
☐ Adjustable/ handheld showerheads, 6-foot hose
☐ Tub/Shower controls offset from center
☐ Shower stall with built-in antibacterial protection
☐ Light in shower stall
☐ Toilet 2 ½ inches higher than standard toilet (17 to 19 inches) or height-adjustable
☐ Design of the toilet paper holder allows rolls to be changed with one hand
☐ Wall-hung sink with knee space and panel to protect user from pipes
☐ Slip-resistant flooring in bathroom and shower

NOTES:__________________________________________________________________________

Stairways, Lifts, and Elevators

☐ Adequate hand rails on both sides of stairway, 1 ¼-inch diameter
☐ Increased visibility of stairs through contrast strip on top and bottom stairs, color contrast between treads and risers on stairs and use of lighting

NOTES:__________________________________________________________________________
Multi-story homes may provide either pre-framed shaft (i.e. stacked closets) for future elevator, or stairway width must be minimum of 4 feet to allow space for lift.

Residential elevator or lift

NOTES:______________________________________________________________

Ramps

- Slope no greater than one inch rise for each 12 inches in length, adequate handrails
- Five-foot landing provided at entrance
- Two-inch curbs for safety

NOTES:______________________________________________________________

Storage

- Adjustable closet rods and shelves
- Lighting in closets
- Easy open doors that do not obstruct access

NOTES:______________________________________________________________

Electrical, Lighting, Safety, and Security

- Light switches by each entrance to halls and rooms
- Light receptacles with at least two bulbs in vital places (exits, bathroom)
- Light switches, thermostats, and other environmental controls placed in accessible locations no higher than 48 inches from floor
- Electrical outlets 15 inches on center from floor; may need to be closer than 12 feet apart
- Clear access space of 30 inches by 48 inches in front of switches and controls
- Rocker or touch light switches
- Audible and visual strobe light system to indicate when the doorbell, telephone or smoke or CO₂ detectors have been activated
- High-tech security/intercom system that can be monitored, with the heating, air conditioning, and lighting, from any TV in the house
- Easy-to-see and read thermostats
- Pre-programmed thermostats
- Flashing porch light or 911 switch
- Direct wired to police, fire, and EMS (as option)
- Home wired for security
- Home wired for computers

NOTES:______________________________________________________________
Flooring

☐ Smooth, non-glare, slip-resistant surfaces, interior and exterior
☐ If carpeted, use low (less than ½ inch high pile) density, with firm pad
☐ Color/texture contrast to indicate change in surface levels

NOTES:__________________________________________________________________________

Heating, Ventilation, and Air Conditioning

☐ HVAC should be designed so filters are easily accessible
☐ Energy-efficient units
☐ Windows that can be opened for cross ventilation, fresh air

NOTES:__________________________________________________________________________

Energy-Efficient Features

☐ In-line framing with two by six studs spaced 24-inch on center
☐ Air-barrier installation and sealing of duct work with mastic
☐ Reduced-size air conditioning units with gas furnaces
☐ Mechanical fresh air ventilation, installation of air returns in all bedrooms and use of carbon monoxide detectors
☐ Installation of energy efficient windows with Low-E glass

NOTES:__________________________________________________________________________

Reduced Maintenance/Convenience Features

☐ Easy to clean surfaces
☐ Central vacuum
☐ Built-in pet feeding system
☐ Built-in recycling system
☐ Video phones
☐ Intercom system

NOTES:__________________________________________________________________________

Other Ideas

☐ Separate apartment for rental income or future caregiver
☐ Flex room that can be used as a nursery or playroom when the children are young and as a home office later; if combined with a full bath, room could also be used for an aging parent/aging in place

NOTES:__________________________________________________________________________
